Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Dr. Szebeni described the compliment activation system and how the hypersensitivity is caused by polyethoxylated oils and how the claimed inhibitors inhibit the hypersensitivity. The following were suggested. Claims to define that the hypersensitivity reaction is by compliment activation; delete the compounds claimed by generic terms (last 3 lines of claim 1). Since the application is under final, a continuation will be filed. Applicant possibly will conduct additional experiments for the antibodies specific for compliment activation..
